## CATE BLANCHETT

Dazzled by the bright lights of Hollywood? That luminosity you're experiencing must be the pearlescent glow bouncing off celebrity complexions! Claire O'Mara, from Sydney's Shape MediSpa, has some tips on how to get your best glow on.

- 1 Skin-lightening products help to combat the signs of ageing by targeting telltale indicators such as sunspots, uneven skin tone and hyper-pigmentation.
- 2 "Skin-lightening products work by inhibiting the over-production of pigment," says O'Mara. For best results for your lighter, brighter skin, seek advice from a skin-care professional.
- 3 A broad-spectrum sunblock is an everyday essential when using complexion-lightening products.
